

# SSP Valves

## SSP Valves

- Check Valves
- Inline Filters
- Toggle Valves

- Needle, Metering & Lower Packing Valves
- Tee Filters

At SSP, we are proud to be an American manufacturing success story.

**100% of our products are made in America.** All of our manufacturing is performed in our 165,000 sq. ft. facility located near Cleveland, Ohio. Our facility is the largest vertically integrated, single-site operation in the industry. In addition to manufacturing and assembly, we have closed die forging, tool & die design, product engineering and testing operations under the same roof with customer service and management.

**Made in America is good business.** Not only do we make everything in America, we use American suppliers too. Buying American allows us to have better quality control and a more reliable supply chain. We can work more closely within our walls and with our suppliers to improve quality, reduce costs, and shorten lead times, which means faster service and better products for you.

**SSP** Industry Standard Products.  
*Made Better.*

## SSP Fittings Corp. (SSP)

Since its inception in 1926, SSP has developed into an internationally recognized manufacturer of the highest quality machined products.

This successful U.S. corporation's heritage of craftsmanship and business expertise provide the foundation for a valve division specializing in providing alternatives in quality instrumentation and process system valves,

tube, pipe, weld, hose and adapter fittings. SSP's world-renowned manufacturing, engineering, quality, sales and distribution now support valve product line expansion and provide the end-user with a single source for their instrumentation and process system valve and fitting needs.

## SSP Valves

From its origination in 1960, SSP Valves have been manufactured to meet the highest quality and performance standards associated with the instrumentation, control, and process industry marketplace. The SSP product line was initiated and expanded in response to expressed needs for solutions in unique flow control applications. Out of its original beginnings of specialization, standard product lines became available to serve a wide variety of applications and customers. The broad offering of operating pressure and temperature ranges, flow control options and end connections has made SSP the product of choice for many applications. In 2001, the SSP valve product lines were acquired by SSP to supplement and complement SSP's historic product offering of quality.

NOTICE: SSP has made every reasonable effort to insure the accuracy of the information contained in this publication, and is not to be held liable in any manner for any mistakes, omissions, typographical and/or printing errors.

# Product Line

## Check Valves

- Pressures to 6000 psig
- Temperatures to 400°F
- O-ring Seat Seal
- 316 Stainless Steel
- Cracking Pressures: 1/3, 1, 5, 10, 15, 25, 50 psig
- **Standard Production Testing:** Every check valve is tested for crack and reseal performance

## Toggle Valves

- Pressures to 200 psig
- Temperatures to 200°F
- FKM Seals
- PTFE Seat
- 316 Stainless Steel, Brass
- Straight & Angle Patterns
- **Standard Production Testing:** Every toggle valve is assembled and tested @ 200 psig with Nitrogen

## Tee Filters

- Pressures to 5000 psig
- Temperatures to 450°F
- PTFE Gaskets
- 316 Stainless Steel, Brass
- Elements (Micron) 1, 2, 5, 10, 20, 40, 60, 100, 200, 400
- Installation: The best installation practice to help proven contaminants from entering the system during element change is to orient the filter with the cap downwards

## Inline Filters

- Pressures to 3000 psig
- Temperatures to 400°F
- Replaceable Filter Elements
- 316 Stainless Steel, Brass
- Elements (Micron) 1, 2, 5, 10, 20, 40, 60, 100, 200

## Needle, Metering & Lower Packing Valves

- Pressures to 6000 psig
- Temperatures to 450°F
- Metal-to-Metal & Soft Seat Stems
- 316 Stainless Steel, Brass
- Straight & Angle Patterns
- **Standard Production Testing:** Every needle, metering and lower packing valve is assembled and tested @ 1000 psig with Nitrogen

## End Connections

SSP valves are available with a choice of Duolok®, Unilok® and Griplok® fractional tube fittings and TruFit® pipe end connections.

### Duolok®

Tube fitting end connections directly interchangeable/intermixable with Swagelok® tube fittings.

### Griplok®

Tube fitting end connections directly interchangeable/intermixable with Hoke® Gyrolok® tube fittings.

### Unilok®

Tube fitting end connections directly interchangeable/intermixable with Parker CPI® tube fittings.

### TruFit®

Pipe fitting end connections directly interchangeable with fittings provided by Swagelok®/Cajon®, Parker® and Hoke®.

# CH Series Check Valves

## High-Pressure Check Valves

CH Series check valves are designed for high pressure, high cycle applications up to 6000 psig (413 bar). They are available with a variety of O-ring materials. Standard cracking pressures range from 1/3 to 25 psig (0.03 to 1.7 bar).

### Product Design

- ① O-ring
  - Wide variety of o-ring materials
  - Easy maintenance
- ② O-ring Retainer
  - Fully supports the O-ring to prevent extrusion
- ③ Poppet Style Design
  - Vee shape maximizes sealing area
- ④ Gasket Seal
  - Metal to metal seal to the environment

### Cracking & Reseal Pressures

Nominal Cracking Pressure psig (bar)	Cracking Pressure Range psig (bar)	Reseal Pressure psig (bar)
1/3 (0.03)	Up to 3 (0.21)	Up to 6 (0.42) back pressure
1 (0.07)	Up to 4 (0.28)	Up to 5 (0.35) back pressure
5 (0.35)	3 TO 9 (0.21 TO 0.63)	Up to 2 (0.14) back pressure
10 (0.69)	7 TO 15 (0.49 TO 1.1)	3 (0.21) or more upstream pressure
25 (1.7)	20 TO 30 (1.4 TO 2.1)	17 (1.2) or more upstream pressure

When valves remain inactive for an extended duration, the initial cracking pressure might exceed the predetermined cracking pressure.

### O-rings

Material	Temperature Rating °F (°C)
Fluorocarbon FKM (STD)	-10 TO 400 (-23 TO 204)
Nitrile	-20 TO 250 (-28 TO 121)
Low-Temp Nitrile	-40 TO 250 (-40 TO 121)
Ethylene Propylene	-50 TO 250 (-45 TO 121)
Kalrez	0 TO 400 (-17 TO 204)

### Pressure - Temperature & Flow

Series	Maximum Flow Coefficient (Cv)	Downstream Pressure at 70°F (20°C) psig (bar)
CH4	0.60	6000 (413 bar)
CH8	2.15	
CH16	3.25	5000 (345 bar)

### PRODUCTION TESTING

Check valves are 100% factory tested with nitrogen to confirm cracking pressure, reseal pressure, and for shell leakage at 1000 psi.

### Materials of Construction

ID	Component	Material
1	Inlet Body	316 SS
2	O-ring	Fluorocarbon FKM
3	O-ring Retainer	316 SS
4	Connector Gasket	316 SS
5	Poppet	316 SS
6	Spring	302 SS
7	Outlet Body	316 SS

All components are wetted

# How to Order

## CH Series Check Valves

### Ordering Instructions

- 1 Select the basic part number from the Part Numbers and Dimensions table . Example: **CH4-D4**  
Default tube end connections are Duolok. For Unilok or Griplok, add U or G to the basic part number.  
CH4-U4 (Unilok), CH4-G4 (Griplok)
- 2 Select the cracking pressure designator, then add it to the part number. Example: **CH4-D4-1**
- 3 Select the material designator, then add it to the part number. Example: **CH4-D4-1-316**
- 4 Add additional options and accessories in alphabetical order. Example: **CH4-D4-1-316-BN-XP98**

### Part Numbers and Dimensions

End Connections		Basic Part Number	Valve Series	Dimensions	
Type Inlet / Outlet	Size			A in. (mm)	B Hex in.

- Blank Fluorocarbon FKM (STD)
- BN Nitrile
- NBR3 Low-Temp Nitrile
- EP Ethylene Propylene
- KZ Kalrez

**Special Cleaning**

- XP98 ASTM G93, Level C and CGA G-4.1

**!** Check valves are intended solely for regulating directional flow. It is essential to avoid utilizing SSP Check Valves as a substitute for safety relief devices as per industry standards.

# 4000 Series

## Ball Poppet Check Valves

4000 Series ball poppet check valves control back flow and maintain upstream pressure in applications have working pressures up to 6000 psig (413 bar) and temperatures from -15 to 350° F (-26 to 176°C).

### Product Design

- ① Fully Contained O-rings
  - Prevents O-ring extrusion and blow-out
- ② Caged Ball
  - Reliable cracking and resealing
  - Prevents over-stressing of the seal
- ③ Stem
  - Prevents spring over-compression
- ④ Variety of End Connections

### Cracking & Reseal Pressures

Nominal Cracking Pressure psig (bar)	Cracking Pressure Range psig (bar)	Reseal Pressure psig (bar)
1/3 (0.03)	Up to 1 (0.07)	Up to 6 (0.42) back pressure
1 (0.07)	Up to 3 (0.21)	Up to 6 (0.42) back pressure
10 (0.69)	7 TO 15 (0.49 TO 1.1)	3 (0.21) or more upstream pressure
25 (1.7)	20 TO 30 (1.4 TO 2.1)	17 (1.2) or more upstream pressure

# Tee Filters

## 3000 Series Tee-Type Particle Filters

Tee Filters are designed to remove unwanted particle impurities from samples in addition to protecting analyzers and other sensitive system components and equipment. Tee filter filtration elements can be changed without removing the filter from the system.

## Product Design

- 1 Replacement of filter element without removing filter body from system
- 2 Available in 316 Stainless Steel and Brass
- 3 Replaceable sintered or strainer elements are available in choice of micron sizes
- 4 Choice of Duolok®, Unilok®, Griplok® tube fittings and TruFit® NPT pipe end connections

## Materials of Construction

ID	Component	316 SS	Brass
1	Body*	316 SS	Brass
2	Filter Seal*	PTFE	PTFE
3	Filter Element*	316 SS	316 SS

4	Spring*	316 SS	316 SS
5	Body Seal*	PTFE	PTFE
6	Cap*	316 SS	Brass

\*Wetted Components

## Filtration Definitions

- **Micron** - A unit of measure used to describe the mean particle diameter of media contamination or the mean pore diameter of the filter element. (1 micron = 0.001mm)
- **Filter Element** - The component of a filter that captures the contaminants. Available as sintered element or strainer.

## Pressure - Temperature Chart

	Stainless Steel	Brass
Temp Rating	-20°F to 450°F	-20°F to 400°F
Pressure Rating @ 100°F	5,000 psig	3,000 psig

### Sintered

- Traps fine contamination particles
- Choice of micron sizes (1 to 200)
- 316 Stainless Steel

### Strainer

- Effectively removes large particles
- Choice of micron sizes (140 or 400)
- 316 Stainless Steel

# How to Order

# Inline Filters

## 3100 Series Inline Filters

Inline filters remove system contaminants and maintain fluid purity in instrumentation and process systems. Sintered metal and mesh elements trap particles to protect sensitive equipment such as sensors and analyzers. Inline filters are used where more direct flow through the filter and compact size are required.

## Product Design

- 1 MAWP: Up to 3000 psig (206 bar)
- 2 Temperature: -20°F to 400° F
- 3 Liquid and gas service
- 4 End Connections: Duolok®, Unilok®, Griplok® tube fittings, tube adapters, and TruFit® NPT pipe end connections
- 5 Body Materials: 316 SS, Brass
- 6 Sintered Metal Filter element sizes: 1 to 200 microns.

## Materials of Construction

ID	Component	316 SS	Brass
1	Body*	316 SS	Brass
2	Filter Seal*	PTFE	PTFE

# How to Order

## 3100 Series Inline Filters

### Ordering Instructions

- 1 Select the basic part number from the Part Numbers and Dimensions table based on the end connections and orifice size for the valve. *Example: 3108*
- 2 Select the micron element size designator, then add it the part number. *Example: 3108-10*
- 3 Select the material designator, then add it the part number. *Example: 3108-10-316*
- 4 Add additional options and accessories in alphabetical order. *Example: 3108-10-316-XP98*

**A** BASIC PART NUMBER  
See Chart

**B** FILTER ELEMENT

<i>Sintered</i>	-1	-40	<i>Strainer</i>	-140
	-2	-60		-400
	-5	-100		
	-10	-200		
	-20			

**C** BODY MATERIAL

-316	<i>Stainless Steel</i>
-B	<i>Brass</i>

**D** OPTIONS

**SPECIAL CLEANING**

-XP98	<i>ASTM G93, Level C and CGA G-4.1</i>
-XP97	<i>ASTM G93, Level C and CGA G-4.1 No Lube</i>
-LE	<i>Less Element</i>

### Filtration Definitions

**Micron** - A unit of measure used to describe the mean particle diameter of media contamination or the mean pore diameter of the filter element. (1 micron = 0.001mm)

**Filter Element** - The component of a filter that captures the contaminants. Available as sintered element or strainer.

#### Sintered

- Traps fine contamination particles
- Choice of micron sizes (1 to 200)
- 316 Stainless Steel

#### Strainer

- Effectively removes large particles
- Choice of micron sizes (140 or 400)
- 316 Stainless Steel

# Metering Valves

## 500 Series Metering Valves

500 Series Metering Valves are designed for analyzers, instrumentation, laboratory, and other applications where accurate control of flow is required.

## Product Design

- 1 MAWP: Up to 6000 psig
- 2 Temperature: -40° to 450°F (-40 to 316°C)
- 3 Stem Angles:
  - 8° Standard (0.47 orifice)
  - 10° Standard (All other orifice sizes)
  - 2° Optional (All orifice sizes)
- 4 Orifice Sizes: From 0.047" to 0.250"
- 5 Body Materials: 316 SS, and Brass
- 6 Packing Materials: PTFE
- 7 Straight and angle patterns
- 8 End Connections: Duolok, Griplok, Unilok tube end, and NPT and BSPT pipe ends.
- 9 End connection Sizes:
  - 1/8 to 1/2 in.
- 10 Handles: Stainless Vernier, Knurled, and T-bar

### Chrome Plated Stem

- Increased durability
- Greater corrosion resistance

### Live Loaded Packing

- Fully supported chevron packing
- Easy inline adjustment

### Stem Angles

- 2", 8", 10", included angle

### Durable Handle

- Brass insert
- Options
  - Stainless Steel T-bar
  - Stainless Steel Knurled
  - Vernier

### Panel Mounting

- ### Precision Threads
- Precise regulation

# Needle Valves

## 100 & 600 Series Integral Bonnet Needle Valves

SSP Needle Valves are designed for positive shut-off and regulation control of media in instrumentation and process systems. With a variety of end connections, temperature ranges, and pressures, integral bonnet needle valves are used in a wide range of instrumentation, control, utility and mechanical systems.

## Product Design

- 1 Live loaded Chevron packing**
  - Fully supported packing prevents extrusion.
  - Self-adjusting reduces maintenance and packing adjustments.
  - Easy inline adjustment
- 2 Chrome plated stem**
  - Greater corrosion and gall resistance for increased durability
  - Precision threads for leak-tight shut off

- 3 Stem tip**
  - Vee-tip
  - PCTFE
- 4 Durable Handle**
  - Nylon
  - Brass insert
  - Stainless steel knurled and T-bar handles available
- 5 Panel Mounting**

# How to Order

## 100 & 600 Series Integral Bonnet Needle Valves

### Ordering Instructions

- 1 Add the angle pattern designator. Example: **A**
- 2 Add the basic part number from the chart B. Example: **A118**
- 3 Add the stem type from chart C. Example: **A118-K**
- 4 Add the material designator from Chart D. Example: **A118-K-316**
- 5 Add options from the Chart E. Example: **118-K-316-TBH**

<p><b>A SHAPE</b> Straight Blank Angle A</p>	<p><b>B BASIC PART NUMBER</b> 100/600 Series See Chart</p>	<p><b>C STEM</b> Vee-Tip PCTFE-Tip</p>	<p><b>D BODY MATERIAL</b> 316 SS -316 Brass -B</p>

# Lower Packing Valves

## 400 Series Valves

400 Series lower packing needle valves provide positive shutoff for applications having working pressures up to 5000 psig. Lower packing needle valves feature packing below the stem threads to maintain stem lubrication and to protect stem threads from corrosive or erosive media. With orifice sizes up to 0.562 in. and end connections up to 1 in., 400 Series needle valves offer higher flow than other instrumentation needle valves.

## Product Design

- 1 Durable Handle
  - Brass insert
  - Stainless Steel T-bar
  - Stainless Steel Knurled
- 2 Non-wetted Actuation Thread
  - Protects lubricant and valve operation
  - Reduces system contamination
  - Ease of actuation
  - Precise regulation
  - Tight shutoff

STRAIGHT AND ANGLE FLOW PATH  
100% FACTORY TESTED

- 3 Panel Mounting
- 4 Stem Tips
  - All metal blunt tip
  - PCTFE soft tip
- 5 Variety of orifice sizes
- 6 Variety of end connections

# How to Order

## 400 Series Lower Packing Valves

### Ordering Instructions

- 1 Add "A" for angled valve or leave blank for straight. Example **A**
- 2 Add the basic part number. Example **A400**
- 3 Add the material. Example **A400-316**
- 4 Add stem type. Example **A400-316-K**
- 5 Add options from the Chart E. Example: **A400-316-K-U**

**A**   **B** - **C** - **D**   **E**

A   400   -316   -K   -U

**A** **ANGLE PATTERN**  
Blank   Straight  
A   Angle

**B** **BASIC PART NUMBER**  
See Chart

**C** **MATERIAL**  
-316   316 Stainless Steel  
-B   Brass

**D** **STEM TYPE**  
Blank   Metal Stem Tip (Vee)  
K   Soft Seat, PCTFE

**E** **OPTIONS**

**Handles**

Black   Blank (Standard)  
SS Tee Bar   -TBH

**Tube End Connections**

Duolok   Blank (Standard)  
Unilok   -U  
Griplok   -G

# Toggle Valves

## 200 Series Toggle Valves

Toggle Valves are designed for quick actuation and positive on-off control of media in low pressure and temperature applications encountered in instrumentation and process systems.

## Product Design

- 1 Spring-Loaded Actuation
  - Quick opening and closing
  - Visual flow indication
  - Positive shutoff to 200 PSIG
  - High-Cycle Life

- 2 Panel Mountable

- 3 Durable Handle
  - Solid Brass
  - Chrome plated option

- 4 O-Ring Stem Seal

Straight and Angle Flow Path

Variety of End Connections

- Fractional Duolok®, Unilok® and Griplok® tube ends
- Metric Duolok® tube ends
- TruFit® NPT and ISO/BSPT pipe ends

100% Factory tested

# How to Order

## 200 Series Toggle Valves

### Ordering Instructions

- 1 For angle valves, Add "A" to the beginning of the part number. Example: A
- 2 Select the basic part number from the Part Numbers and Dimensions table based on the end connections for the valve. Example: A208
- 3 Add the body material designator to part number. Example: A208-316
- 4 Add options from the Chart D. Example: A208-316-U

#### A ANGLE PATTERN

Blank Straight  
A Angle

#### B BASIC PART NUMBER

See Chart Below

#### C MATERIAL

-B Brass  
-316 Stainless Steel

#### D OPTIONS

<b>Seal Material</b>		<b>Tube End Connections</b>
Nitrile	-BN	Duolok Blank (Standard)
		Unilok -U
		Griplok -G

### Part Numbers and Dimensions

End Connection		Basic Ordering Number	Dimensions in. (mm)									
Inlet/Outlet	Size		Orifice	A	B1	B2	C	D	E	F	G	H
Fractional Tube Fitting <sup>1</sup>	1/8	206	0.094 (2.4)	2.34 (59.4)	1.17 (29.7)	1.17 (29.7)	0.40 (10.2)	0.38 (9.6)	2.34 (59.6)	1.12 (28.5)	0.25 (6.4)	17/32 (13.5)

## SSP Valves

### LIFETIME LIMITED WARRANTY

SSP valves are guaranteed to be free from defects in materials and workmanship. To initiate a warranty claim, suspected defective product must be returned with the nature of potential defect documented for factory evaluation. Any product with a determined defect in material or workmanship will be replaced with equivalent product at no charge.

This warranty comprises the sole and entire warranty pertaining to items provided hereunder. There is no other warranty, guarantee, express or implied representation of any kind whatsoever. All other warranties including, but not limited to, merchantability and fitness for purpose, whether express, implied, or arising by operation of law, course of dealing, or trade usage are hereby disclaimed. There are no warranties that extend beyond the description on the face hereof; and this warranty does not apply in cases of abuse, mishandling, or normal use depreciation. In no event, whether alleged to arise from breach of contract, express or implied warranty, by operation of law, negligence or otherwise, will there be any liability for any incidental, consequential, lost property, or other special damages of any kind whatsoever. The exclusive, only remedy under this warranty is the replacement of determined defective parts as set forth above.

## Safety

To help ensure the safe and reliable performance of valve products, complete system design must be considered prior to the installation of the valves and end connections.

Determining the design compatibility of materials, media, flows, temperatures and pressures, as well as implementing proper installation, operation and maintenance of the system are the responsibilities of the systems' owners, designers and users.

## Safety Reminders

All SSP products are designed and manufactured with safety in mind. The following is a limited list of general safety tips as reminders of good safety practices:

- Do not install, tighten or loosen a valve or filter while the system is under pressure.
- Do not loosen a valve, filter, nut or end connection to relieve or bleed system pressure.
- Always use a back-up wrench to hold the valve or filter body steady when tightening or loosening end connections.
- There is no need to disassemble a new valve or filter prior to use.
- Use proper thread lubricants and sealants on tapered pipe threads.
- If Fractional Tube Fitting end connections are used with very soft pliable plastic tubing, a tube insert is required for proper installation.
- Valve Tube Fitting end connection and tubing material should be similar (stainless steel fittings on stainless steel tubing, brass fittings on copper tubing, etc.) with the tubing material being fully annealed.

# More SSP Products

## Tube Fittings

Duolok and Griplok two-ferrule and Unilok® single ferrule tube fittings provide leak-tight installation even when intermixed with Swagelok®, Hoke Gyrolok® and Parker CPI™ fittings.

## Valves

The SSP valve offering includes ball, check, metering, needle, toggle, plug, bleed, and purge valves for pressures up to 10,000 psig.

## Tubing

SSP offers straight and coiled seamless 316 stainless steel instrumentation tubing for instrumentation, process and utility applications.

## Pipe Fittings

TruFit and TruFit 10K pipe fittings are available in a wide range of weld, threaded and flared connections.

## Filters

SSP in-line and tee-type filters trap particles to clean sample fluids and protect sensitive process and analytical instrumentation components and equipment.

## Tools & Accessories

SSP TurnPro professional hand tools, power tools and installation training make quality tube system installation faster and easier.

## Quick Connects

SSP offers single-end shutoff, double-end shutoff, and full-flow quick connects for instrumentation and process applications.
